## UFOP Market Information Oilseeds and Biofuels

The latest UFOP (Union zur Förderung von Öl- und Proteinpflanzen) Market Information Oilseeds and Biofuels reports on the development of rapeseed and biodiesel versus mineral diesel. Despite some weakness at the end of the month, February rapeseed prices were up around EUR 5 per tonne from the previous month's level. The key factor for the rise was prices of soybean and palm oil, supported by tight supply. Interest in buying biodiesel continued to be small in February.
