Reminder: Eco-Mobility 2025+

November 9th and 10th, 2015 Tech Gate Vienna

Eco-Mobility 2025plus is an international two-day conference with the aim to analyze trends in the development of advanced power train and vehicle technologies as well as energy carriers with the target to overcome barriers for their market introduction. Industry, R&D institutions and policy makers will discuss the potential of these technologies for a sustainable mobility system and the competitiveness of the vehicle industry and the energy sector.
